

🔌 Set up your freezer

- Prior to using the freezer, make sure it is located on a floor that is level and strong enough to support it fully loaded. Remove tape and glue residue and clean surfaces with soap and water before turning on the unit.
- If you are using your freezer in a kitchen, we recommend you set your temperature at 0°F (-18°C). After 24 hours, you can adjust the control as desired, allowing the temperature to stabilize.

Press either **+** or **-** to adjust to desired temperature setting inside the refrigerator. **°F/°C** allows you to switch between Fahrenheit (°F) and Celsius (°C).

⊕ Care and cleaning

- Immediately wipe up any spills and clean your freezer at least twice per year. Keeping your freezer clean prevents odor build up and maintains appearance.
- More powerful than baking soda, PureAdvantage Ultra II™ Air Filter absorbs undesirable smells keeping your freezer fresher. We recommend replacing your filter at least once every 6 months.

Your Filter:
ELPAULTRA2 PureAdvantage Ultra II™ Air Filter

? FAQs

- **What does the alarm or “buzzer sound” mean?**
An alarm or “buzzer sound” can mean your door is open, a power outage or **HI TEMP** has been detected. In most cases, simply acknowledge the alarm by resetting it. However, in the event of a **HI TEMP**, it’s a good idea to make sure your freezer is level and the door closes freely with a proper seal. Once you close your freezer door, leave it closed so the freezer temperature can decrease and stabilize to the set temperature.
- **Why does my freezer seem to run continuously?**
Your variable speed compressor is designed to run 100% of the time except during the defrost cycle. At times it will run faster, such as after a defrost cycle.
- **The temperature is warmer or colder than preferred. What can I do?**
Adjust the temperature by 1 or 2 degrees and allow 24 hours for the temperature to stabilize. Check to ensure food items are not blocking the multi-port air exhaust ducts as this will impact performance.

Welcome to an effortless appliance protection experience.

Have peace of mind knowing we are here to always keep your appliance in peak performance.

- Register your product for a more effortless experience by scanning the QR code.
- Extend your manufacturer’s limited warranty with an appliance protection plan to ensure you are always protected from surprises, including up to \$250 of food-loss coverage and a worry-free guarantee we’ll replace what we can’t repair.
- Ever in need of service or repair? Our trusted Electrolux-trained technicians are experts on your appliance and can provide reliable service and repair work.
