

Single-Door Freezer

Quick Start Guide

See your online User Manual for more information

Getting Started

1. Set up your freezer

- Prior to using the freezer, make sure it is located on a floor that is level and strong enough to support it fully loaded. Remove tape and glue residue and clean surfaces with soap and water before turning on the refrigerator.
- If you are using your freezer in a kitchen, we recommend you set your temperature at 0°F (-18°C). After 24 hours, you can adjust the control as desired, allowing the temperature to stabilize.

Press either + or - to adjust to desired temperature setting inside the refrigerator. °F/°C allows you to switch between Fahrenheit (°F) and Celsius (°C).

2. Keep your freezer fresh

More powerful than baking soda, **PureAir® Ultra II™ Air Filter** absorbs undesirable smells keeping your freezer fresher for up to 6 months.

We recommend replacing your filter at least once every 6 months.

FAQs

What does the alarm or “buzzer sound” mean?

An alarm or “buzzer sound” can mean your door is open, a power outage or **HI TEMP** has been detected. In most cases, simply acknowledge the alarm by resetting it. However, in the event of a **HI TEMP**, it's a good idea to make sure your freezer is level and the door closes freely with a proper seal. Once you close your freezer door, leave it closed so the freezer temperature can decrease and stabilize to the set temperature.

Why does my freezer seem to run continuously?

Your variable speed compressor is designed to run 100% of the time except during the defrost cycle. At times it will run faster, such as after a defrost cycle.

Is it normal to hear a popping or cracking sound when the compressor runs?

Yes, this is normal. These sounds can be caused by the freezer's internal components as they expand and contract with temperature changes, or by the circulation of the refrigerant that's used to cool the freezer.

The temperature is warmer or colder than preferred. What can I do?

Simply adjust the temperature by 1 or 2 degrees and allow 24 hours for the temperature to stabilize. Check to ensure food items are not blocking the multi-port air exhaust ducts as this will impact temperature performance.

Register to Win \$10,000

Take the first step to becoming a part of the Frigidaire family and discover more benefits by registering your single-door freezer on Frigidaire.com.

We're Here to Support

Have peace of mind knowing Frigidaire is here to always keep your appliance in peak performance.

- **Total Appliance Protection:** Extend your manufacturer's limited warranty to ensure you are always protected from surprises, including up to \$250 of food-loss coverage and a worry-free guarantee we'll replace what we can't repair.
- **Frigidaire Expert Service:** Ever in need of service or repair? Our trusted Frigidaire-trained technicians are experts on your appliance and can provide reliable service and repair work.
