Greetbot - Welcome Reception | Solicit Business | Multimodal Human-computer Interaction

Greetbot has configured Google Assistant to understand your words and quickly answer questions and perform tasks. Global models can be selected into ChatGPT, Gemini, Claude and other large models, to adapt to the overseas environment dialogue

"Well, I am here for you.
I always will be"

"Greetbot, today is in a good mood,
to some dynamic music"

"Good, I also likes music with a
strong sense of rhythm"

"Greetbot, I made an appointment with
your vice president Lin, lead the way."

"Good, Greetbot will inform Lin vice president,
take you to the rest room to sit, you drink what?"

"Greetbot, what good movies recently."

"Well, well, there are many films released recently, and Greetbot recommends The Miracle of Science most most. The film not only shows the persistence and courage of human beings in the face of difficulties, but also explores the relationship between scientific research and ethics."

" Could you help me, please?"

"Yes, what can I do for you? I can sing, dance, lead the way, and find people. I have great skills. "
