

 **ILVE**

Professional Plus Nostalgie

Professional cooking ranges,
dedicated to the kitchen in your home

50 years' expertise in the manufacture of professional kitchens.

ILVE has been the true cooking system specialist for more than 50 years. From its earliest days, the company has stood out for its commitment to innovation. In 1969 we developed the built-in maxi oven, followed a few years later by the revolutionary Panoramagic cooker, a milestone in the history of the industry.

The re-release of the Panoramagic in 2017 won ILVE the Good Design Award. Over its 50 years, ILVE has constantly designed and made solutions capable of optimising the kitchen experience and improving the quality of life of its clients, because good cooking is an essential part of the good life.

High-end workmanship

ILVE was established in 1969 at Campodarsego, Padua, and is proud to carry on the artistic traditions, passion for the earth, spirit of innovation, craftsmanship and steel fabrication skills for which its territory is renowned. Technology, styling and functionality are the strong points of ILVE kitchens.

ILVE owes its success to its extraordinarily flexible design and production, which enable it, together with its focus on its core business, to satisfy any requirements in cooking. The ILVE product range is certainly the widest currently available on the world market, and it boasts construction quality that has few rivals.

This is why our kitchens are high performance, multifunctional and completely reliable. Designed to last and for ease of use, they are conceived to satisfy every need and taste.

The cooking professionals

ILVE cookers take their inspiration from the professional kitchens used by the great chefs to cook their gastronomic creations.

ILVE offers the kitchen virtuoso the ability to express his or her potential to the full, with a range of options designed to enhance creativity. ILVE cookers are not just beautiful to look at, they are fully fledged tools with professional performance and reliability. ILVE uses the same materials used in professional kitchens: steel, Aisi 304 stainless steel, enamel, cast iron, brass and copper.

And not just the raw materials, the components too are subject to the most stringent, unrelenting quality and reliability controls. But the true secret of ILVE products is how they are made, using jealously kept secret methods. All our domestic appliances are made individually to the client's specification, and assembled by hand: because there's no substitute for the expert eye and hand of the specialist craftsman.

Environment & sustainability

ILVE knows extremely well how necessary it is for its activities to protect the environment, so it makes all possible efforts to ensure that its production processes comply with all sustainability, safety and efficiency standards required. The entire product range is manufactured with great care, using materials which are recyclable and not harmful to the environment.

ILVE has designed its appliances to ensure their users consume energy more responsibly. 99% Of all the materials used by ILVE to manufacture and package its products are recyclable. ILVE is in full compliance with the European Directive governing the Restriction of Hazardous Substances (RoHS). All our suppliers are carefully vetted and our materials are safe. Safety is certified to the most stringent standards by the major industry bodies.

Oven cooking functions

Pizza function

Ideal for cooking pizza and bread. Heat is supplied primarily by the bottom element which combines with the other elements at low power settings to create the ideal conditions for this type of cooking.

Defrost

Quickly defrosts all frozen foods and brings them up to room temperature. Defrosting to room temperature does not affect the look and flavour of the food.

Intense cooking

Quick intensive cooking with steam exhaust. Ideal for foods with a crust, like roast potatoes and vegetables, chicken, salted fish, etc.

Fan grill cooking

Very fast, deep cooking with excellent power savings, ideal for dishes like pork ribs, sausages, kebabs, game, baked pasta, etc.

Closed door grill cooking

The ideal function for fast, deep cooking, for gratins and roast meats, fillets, Florentine steaks, grilled fish and vegetables.

Top cooking

Particularly suited to browning and giving a touch of colour to dishes. Ideal for hamburgers, pork chops, steaks, sole, squid, etc.

Bottom cooking

The best function for finishing off a cooking cycle, especially for pastries (biscuits, meringues, risen and fruit pastries, etc.) and other dishes.

Normal static cooking

The classic electric oven function, ideal for the following foods: pork ribs, sausages, cod, braised meat, game, roast veal, meringues and biscuits, baked fruit and many others.

Multiple fan cooking

Allows you to cook more than one dish at a time, without their aromas contaminating each other. You can cook lasagne, croissants and brioches, fruit tarts, etc.

Options available for

Ovens: 600 / 800 / 900

PIZZA PLATE

Clay plate for pizza, bread, etc.

A/418/04	Mini oven 30

Some news about us

For over 50 years, we've specialised in cooking systems. Our units are directly inspired by professional kitchens where the world's great chefs come up with their gastronomic creations.

We also borrow from the materials used in professional set-ups, such as AISI 304 stainless steel, cast iron, brass and copper - choices that improve the quality of life of our clients. Because cooking well means taking good care of yourself.
