Using Your Oven

- Step 1.** Choose an oven, and then select oven function.
 - Step 2.** Set the temperature.
 - Step 3.** Press Start.
 - Step 4.** Place food inside the oven once set temperature is reached. Close the oven door.
 - Step 5.** (Optional) Enter time to cook.
 - Step 6.** The Cancel button can be used to cancel the function during or after cook time.
- NOTE:** For more detailed instructions on specific functions, see the online Control Guide.

Using Your Range

⚠ WARNING

Fire Hazard

Turn off all controls when done cooking.
Failure to do so could result in death or fire.

The control knobs can be set to anywhere between HI and LO. Push in and turn to setting.

REMEMBER: When range is in use or (on some models) during the Self-Cleaning cycle, the entire cooktop area may become hot.

POSITIONING RACKS AND BAKEWARE

IMPORTANT: To avoid permanent damage to the porcelain finish, do not place food or bakeware directly on the oven door or bottom.

Racks

- Position racks before turning on the oven.
- Do not position racks with bakeware on them.
- Make sure racks are level.
- Place food so it will not rise into the broil element. Allow at least 1/2" (1.3 cm) between pans and the broil element.

To move a rack, pull it out to the stop position, raise the front edge, and then lift it out. Use the following illustrations as a guide for positioning racks.

Rack Positions - Upper Oven

Rack Positions - Lower Oven

For hamburger patties to have a well-seared exterior and a rare interior in the lower oven, use a flat rack in rack position 5. Side 1 should cook for approximately 2 1/2 to 3 1/2 minutes. Side 2 should cook for approximately 4 to 5 minutes. Expect a moderate degree of smoke when broiling.

Baking Layer Cakes on 2 Racks

For best results when baking cakes on 2 racks, use rack positions 2 and 4 with the Convection Bake function. Place the cakes on the racks as shown.

Baking Cookies on 2 Racks

For best results when baking cookies on 2 racks, use rack positions 2 and 4 with the Bake function.

ALUMINUM FOIL

IMPORTANT: To avoid permanent damage to the oven bottom finish, do not line the oven bottom with any type of foil or liner.

For best cooking results, do not cover entire oven rack with foil because air must be able to move freely. Care must be taken to prevent aluminum foil and meat probes from contacting heating elements.

OVEN VENTS

The oven vents release hot air and moisture from the ovens and should not be blocked or covered. Blocking or covering the vents will cause poor air circulation, affecting cooking and cleaning results. Do not set plastics, paper, or other items that could melt or burn near the oven vents.

OVEN LIGHT

The oven light is a 40 W halogen bulb. Before replacing, make sure the oven and cooktop are cool and the control knobs are in the Off position.

To Replace:

1. Disconnect power.
2. Turn the glass bulb cover in the back of the oven counterclockwise to remove.
3. Remove bulb from socket.
4. Replace bulb, using tissue or wearing cotton gloves to handle bulb. To avoid damage to or decreasing the life of the new bulb, do not touch bulb with bare fingers.
5. Replace bulb cover by turning clockwise.
6. Reconnect power.

IMPORTANT: Do not use lamps rated higher than 40 W.

SABBATH MODE:

The Sabbath Mode sets the oven to remain on in a bake setting until disabled.
